# The retractable roof that seals itself

## LOWER COST:

There's no magic in Roll-A-Roof's lower cost. It's just a simpler system. Agra Tech worked to develop the type of retractable roof that growers could afford to buy and use.

## COMPLETE FLEXIBILITY

Roll-A-Roof allows you the flexibility to choose a gutter connected or quonset greenhouse 18' wide to 45' wide and may be controlled by computer, thermostat, or manually.

## 100% FRAME SUPPORTED

The Roll-A-Roof lays on top of and is supported by the arches of your greenhouse just like any stationary poly-roof house.

## RETRO FIT TO YOUR EXISTING HOUSE

If you already have an Agra Tech gutter connected or quonset arch house, you can easily upgrade with the Roll-A-Roof. Many other brands can also have the Roll-A-Roof added as an upgrade.

Roll-A-Roof installed on a Thermolator 30' Quonset located at University of California Irvine.

Roll-A-Roof shown on an Insulator 30 also with an Energy Curtain located at Garden Bloomers Takao Nursery

## Testimonials

*"The roof is such a good value, It gives us so many options. It's not just a conventional greenhouse any more. It can be a shade house. If we open up everything, it's like outdoor conditions. It gives growers like us a lot of flexibility."*

Danny Takao  
Garden Bloomers Takao Nursery  
Fresno, CA

*"The roll-A-roof system gives Ball Tagawa the ability to better control natural light and enables more ventilation in the greenhouse. This improves the height and tone of the plants."*
